PROFESSIONAL SUMMARY

Full Stack Developer specializing in scalable SaaS and E-commerce architectures using Next.js, TypeScript and Supabase. Expert in implementing multi-tenancy with Row Level Security (RLS) and optimizing database performance for real-time applications.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

Jan 2025 – Present

Inventory Management SaaS

- Implementation: Engineered a secure multi-tenant SaaS architecture using Supabase RLS, ensuring absolute data isolation across diverse client databases.
- Problem & Solution: Addressed potential data leakage risks by replacing traditional middleware checks with database-level security policies, reducing backend complexity.
- Outcome: Achieved 100% tenant privacy and streamlined scaling, allowing the system to handle multiple organizations without any cross-talk or security trade-offs.

Restaurant B2B Platform

- Implementation: Developed a high-concurrency QR-ordering system with a real-time KDS (Kitchen Display System), leveraging raw SQL for high-speed data retrieval.
- Problem & Solution: Resolved significant latency issues during peak hours by optimizing complex query execution plans, which boosted transaction throughput by 30%.
- Outcome: Improved kitchen operational efficiency and drastically reduced order-to-table time, ensuring a seamless experience for both staff and customers.

E-commerce

- Implementation: Deployed a performance-driven Next.js engine, hitting 95+ Lighthouse SEO scores through advanced server-side rendering and asset optimization.
- Problem & Solution: Mitigated checkout abandonment and trust issues by integrating Cashfree's secure payment gateway and a robust real-time order tracking system.

- Outcome: Enhanced organic search visibility and user retention, resulting in a faster, more reliable shopping experience that handles high-traffic spikes efficiently.
