

AAFAQUE NAZIR

Full Stack Developer

Navi Mumbai, India | aafaquenazir@gmail.com | +91 9325629256 | aafaque.in | [GitHub](https://github.com)

PROFESSIONAL SUMMARY

Full-Stack Developer with 1+ years of experience building production SaaS and e-commerce systems as an independent developer. Specializes in Next.js, TypeScript, and Databases, with particular depth in database-level security (Row-Level Security) and query performance — work that has delivered 100% tenant isolation on a multi-tenant SaaS platform and a 30% jump in transaction throughput on a high-concurrency ordering system. Takes full technical ownership of every build: architecture, APIs, performance, and deployment.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Self-Employed / Freelance

Jan 2025 – Present

Inventory Management SaaS [Live Demo](#)

- Engineered a secure multi-tenant SaaS architecture using Supabase Row-Level Security (RLS), enforcing complete data isolation across client databases at the database layer.
- Replaced traditional middleware-based access checks with database-level security policies, reducing backend complexity while eliminating cross-tenant leakage risk.
- Delivered 100% tenant data isolation with zero cross-talk, enabling the platform to scale across multiple organizations without security trade-offs.

Restaurant Management System [Live Demo](#)

- Built a high-concurrency QR-based ordering system with a real-time Kitchen Display System (KDS), using optimized raw SQL for low-latency data retrieval.
- Resolved peak-hour latency bottlenecks by re-engineering query execution plans, boosting transaction throughput by 30%.
- Reduced order-to-table time and improved kitchen operational efficiency under concurrent order loads.

E-Commerce Platform [Live Demo](#)

- Built the storefront on Next.js with server-side rendering, image optimization, and code-splitting, achieving 95+ Lighthouse SEO scores and fast, crawlable pages for organic search.
- Integrated Cashfree's payment gateway with real-time order tracking, closing the two biggest checkout drop-off points — payment friction and post-purchase uncertainty.
- Deployed on Netlify's edge network for CDN-backed delivery, keeping the storefront fast and available through high-traffic spikes without manual scaling.

Software Development Externship (Simulation) — Datacom, via Forage

Jan 2026

- Performed root-cause analysis on system bugs and proposed architectural improvements for scalable web applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: Next.js, React.js, Tailwind CSS, ShadCN UI, Redux Toolkit, Framer Motion

Backend & Database: Node.js, Express.js, MongoDB, Supabase (PostgreSQL, RLS, Auth), NextAuth.js, REST APIs, Redis

DevOps & Infrastructure: Docker, Kubernetes, Apache Kafka, Vercel, Netlify

Tools: Git, GitHub, VS Code, Antigravity

Core Competencies: Payment Gateway Integration (Stripe/Cashfree), RBAC & Row-Level Security, SEO Optimization, State Management, Agentic AI

CERTIFICATIONS

- React & Next.js with AI-Powered Projects — Udemy
- Generative AI — Google
- Frontend Development — OneRoadmap
- Web Development — freeCodeCamp

EDUCATION

Bachelor of Science, Information Technology — University of Mumbai

2021 – 2024
