

AAFAQUE NAZIR

Full Stack Developer

aafaquenazir@gmail.com | +91 9325629256 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience delivering production SaaS and e-commerce platforms. Specializes in Next.js, TypeScript, and Databases, with deep focus on database-level security (RLS) and query performance. Owns every build end to end: architecture, APIs, performance, and deployment.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

Jan 2025 – Present

Inventory Management SaaS - [Live Demo](#)

- Engineered a secure multi-tenant architecture using Supabase Row-Level Security (RLS), enforcing tenant boundaries at the database layer instead of the application layer.
- Replaced middleware-based access checks with database-level security policies, shrinking backend authorization code by 35% while eliminating cross-tenant leakage risk.
- Delivered 100% tenant data isolation with zero cross-talk across 25+ concurrent organizations, enabling the platform to scale without security trade-offs.

Restaurant Management System - [Live Demo](#)

- Built a high-concurrency QR-based ordering system with a real-time Kitchen Display System (KDS), supporting 50+ concurrent orders per shift with sub-200ms data retrieval via optimized raw SQL.
- Resolved peak-hour latency bottlenecks by re-engineering query execution plans, boosting transaction throughput by 30% and dropping average query time from ~800ms to under 250ms.
- Reduced order-to-table time by 25%, improving kitchen efficiency across 500+ orders processed daily.

E-Commerce Platform - [Live Demo](#)

- Developed the storefront on Next.js with server-side rendering, image optimization, and code-splitting, achieving 95+ Lighthouse SEO scores and sub-2-second page loads for organic search traffic.
- Integrated Cashfree's payment gateway with real-time order tracking, reducing checkout drop-off by 20% and lifting payment success rate to 98%.
- Designed a product catalogue fetching strategy using cursor-based pagination and lazy loading, trimming initial page payload size by over 40%.

Software Development Externship (Simulation) — Datacom, via Forage

Jan 2026

- Performed root-cause analysis on 15+ system bugs across 4 modules, lowering recurring defect patterns by 20%.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: Next.js, React.js, Tailwind CSS, ShadCN UI, Redux Toolkit, Framer Motion

Backend & Database: Node.js, Express.js, MongoDB, Supabase (PostgreSQL, RLS, Auth), NextAuth.js, REST APIs, Redis

DevOps & Infrastructure: Docker, Vercel, Netlify

Tools: Git, GitHub, VS Code, Antigravity

Core Competencies: Payment Gateway Integration (Stripe/Cashfree), RBAC & Row-Level Security, SEO Optimization, State Management, Agentic AI

CERTIFICATIONS

- React & Next.js with AI-Powered Projects — Udemy
- Generative AI — Google
- Frontend Development — One Roadmap
- Web Development — freeCodeCamp

EDUCATION

Bachelor of Science, Information Technology — University of Mumbai 2021 – 2024
